Spec Section 087100

We resubmitted the door hardware schedule this past week. With much debate with our door hardware vendor and Avalon (Spec Section 081210) They are both carrying door hardware for the same doors. Not sure what happened on Forno's end here, But if you can have the architect stop all review on the door hardware as of now that would be great. They can delete all submittals under spec section 087100 as of now, I have a meeting set up for today to discuss the hardware with both vendors and then Forno will send in a master door hardware schedule and product data when we get both vendors on board. Sorry about the confusion on this.
